

Abdul Mujeeb Khan

Senior Flutter Developer / 5 Years / Cross-Platform Mobile / Consumer & Enterprise

+918919355784 ◇ mjkh7124@gmail.com ◇ Hyderabad, Telangana, India ◇ [LinkedIn](#) ◇ [Portfolio](#)

SUMMARY

Spent the last 5 years building Flutter apps across pretty different worlds - consumer eSIM, US enterprise SaaS, an EV charging marketplace, an LMS, logistics, and a Vedic scripture platform. Six are live on Google Play with users in the US, UAE/KSA, and India. Comfortable owning a codebase solo or leading a small team, and good at ramping into unfamiliar domains. Open to fully remote roles with international teams.

EXPERIENCE

Senior Mobile Application Developer

Jul '25 — Present

Soulax Software Pvt Ltd

Hyderabad, India

- Effectively own development, maintenance, and release management for Svarupa, multilingual scripture platform, after team transitions; the company-wide Team Lead provides high-level oversight — see Featured Projects.
- Owned Phase 1 end-to-end of an enterprise warehouse trailer-analytics platform: login, UI/UX, REST API integration, and barcode/pallet scanning.
- Maintain vHUB Inspection and Implemented comprehensive test coverage — authored full unit test suite and partial integration tests, improving release confidence and code maintainability.
- resolved 18+ production bugs and shipped a Google Places API-powered address-search feature for trailer inspections.
- Run multiple concurrent projects across consumer, enterprise, and B2B domains; balance ownership-heavy work with maintenance support depending on the engagement.
- Collaborate with senior and lead engineers across mobile delivery; act as technical reviewer on releases and coordinate with backend, QA, and product teams across time zones.

Member of Technical Staff (L2)

Jun '24 — Jul '25

ZETEXA GLOBAL.

Hyderabad, India

- Owned mobile development of ZetSIM, the company's flagship consumer eSIM + travel-services product — see Featured Projects.
- Optimized the cart system by improving CRUD operations and reducing API call overhead by 35%, resulting in significantly faster checkout performance.
- Implemented multi-currency support across the entire app (plans, packages, cart, checkout) with location-based currency auto-detection
- enhancing personalization and conversion.
- Delivered end-to-end data roaming functionality via native platform channels (Android/iOS) and resolved critical issues in the ZetCoins loyalty system, enabling real-time alerts and reliable reward redemption.
- Supported Android eSIM installation via platform channels, expanding compatibility across major device variants and improving activation rates in key markets.
- Mentored two junior developers; collaborated closely with QA and backend teams to resolve high-priority bugs and regressions, contributing to a more stable, production-ready app.
- Optimized API integration and state management using flutter_bloc, reducing latency and improving screen-to-screen performance consistency.

Mobile Application Developer

Aug '21 — May '24

TYNYBAY Inc

Hyderabad, India

- Lead engineer on SplitEV and SuperConstruct; co-led Falek Tayyeb; solo-built InspireABA — see Featured Projects and Additional Shipped Work.
- Acted as SCRUM Master across multiple deliveries (sprint planning, daily standups, Asana coordination); contributed to CI/CD setup and onboarded/trained new team members.
- Implemented authentication across products including third-party logins (Google, Facebook, Apple), profile management, and secure session handling.
- Owned client interactions and requirements gathering directly with US and UAE/KSA stakeholders
- translated business asks into mobile specs and shipped against them.
- Cut production crash rate roughly in half on a flagship app via Firebase Crashlytics-driven debugging and targeted refactoring.

FEATURED PROJECTS

Svarupa - Multilingual Vedic Scripture Platform, Soulax Software [Link](#)

Jul '25 — Present

- Stack: Flutter, native platform channels (audio + notifications), multilingual REST APIs.
- Built a tap-any-word ●Toolbox● surfacing morphology, translations, sandhi, and svara across 19 languages via integrated REST APIs - a non-trivial linguistic UX problem.

- Engineered ●Match Found● cross-corpus search and a scheduled auto-recitation system using native platform channels for audio playback and notification scheduling.
- Revamped audio UI/UX, added Devata/Rishi/Chanda metadata display, and shipped extensive UI improvements adopted by global Vedic scholars.

ZetSIM - Global eSIM + Travel Concierge App, Zetexa Global [Link](#)

Jun '24 — Jul '25

- Stack: Flutter, BLOC, Firebase, Sentry, Razorpay, PayPal, Stripe.
- Owned end-to-end mobile delivery of a consumer travel-utility app combining global eSIM data plans with airport concierge services (lounge access, fast-track, meet & greet).
- Architected payment infrastructure integrating Razorpay, PayPal, and Stripe to power multi-currency international transactions and recurring data-plan purchases.
- Implemented Sentry production error tracking and Firebase messaging; led release cycles end-to-end with a 3-engineer mobile team.

SplitEV - US-Market EV Charging Marketplace, Tynybay Inc . Client: SplitEV Inc (USA) [Link](#)

2022 — 2024

- Stack: Flutter, BLOC, Google Maps SDK, Smartcar SDK, Stripe, Firebase Crashlytics.
- Led a 4-engineer mobile team building a two-sided EV charging marketplace connecting US drivers with private charger hosts; delivered driver, host, and fleet personas in a single Flutter codebase.
- Integrated Google Maps SDK for real-time charger discovery, Smartcar SDK for live vehicle telemetry (battery state, lock status), and Stripe for subscriptions and host payouts.
- Designed BLOC-driven state architecture spanning subscription tiers, loyalty rewards, and reservation flows; coordinated remotely with a US-based product team.

SuperConstruct - US Construction & Payment SaaS, Tynybay Inc . Client: SuperConstruct LLC (USA)

2022 — 2024

[Link](#)

- Stack: Flutter, GetX, Firebase Push, Firebase Crashlytics.
- Co-built mobile delivery of a US construction-management SaaS handling AIA-style progress invoicing (G702 / G703), Schedule of Values, change orders, and lien-waiver workflows - a fintech-adjacent enterprise feature set.
- Shipped daily logs (text/photo/video), RFIs, document management, inspections, submittals, and project dashboards within a single Flutter codebase serving general contractors, owners, and project managers.
- Product remains in active production with releases shipping into 2026.

ADDITIONAL SHIPPED WORK

ADDITIONAL SHIPPED WORK

- **Falek Tayyeb** — UAE/KSA career platform for TASC Outsourcing (Dubai); third-party community SDK for professional networking. [Google Play](#). / Tynybay, 2022–2023
- **InspireABA** — US-market mobile LMS for AB Academy with multi-format content delivery (PDF / PPT / video), attendance, leave workflows, and a discussion forum. US-only release. / Tynybay, 2021–2023
- **vHUB Inspection** — Customizable fleet and asset inspection app for Finloc 2000 (Canada); shipped a Google Places API address-search feature. [Google Play](#). / Soulax, 2025
- **Trailer Analytics** — Enterprise warehouse trailer-tracking platform; owned Phase 1 end-to-end (login, UI, REST APIs, barcode/pallet scanning). Internal release. / Soulax, 2025

SKILLS

Core Dart, Flutter, Kotlin

Frameworks Flutter, FlutterFlow, Jetpack Compose, Flutter Development (BLoC, GetX, Riverpod)

Backend & APIs REST, GraphQL, Firebase, Supabase, Razorpay Payment Gateway, Stripe API, Paypal Integration

Version Control Systems Git, GitHub, GitLab

Development Tools & SDKs Android Studio, Xcode, VS Code, Postman, Google Maps API, SmartCar SDK, Sentry, Postman Software, Swagger, Unity

EDUCATION

Diploma in Civil Engineering, Nawab Shah Alam Khan College of Engineering

Aug '17 — Oct '20
Hyderabad, India
